In the morning, we will directly head to **Secret Caverns**. Secret Caverns is located in upstate New York. A 103-step staircase with various layers of limestone deposited faithfully by the prehistoric ocean is the only way in or out. Many of the caverns in this area were formed largely during the last Ice Age about 38,000-14,000 years ago. “For thousands of years mineral laden water has been precipitating on the walls, ceiling, and floor of the caverns, leaving behind great deposits of golden calcite. When these deposits hang from the ceiling like icicles, they are called stalactites. When they build up from the floor, they are called stalagmites. And when you see calcite dripping down over the walls or covering the rocks, that is called flowstone.” – You will have a wonderful time with all the views mentioned! **(Note: Due to the cold weather and frozen road since November, Secret Caverns may be closed on some departure date)** From there we will continue on to **Niagara Falls, NY** where we will see **Thundering Water Cultural Show** and **Niagara Falls Illumination**. (*The completeness of night view on certain summer evenings may be limited or not available due to late sunset time and US Federal Government regulations on driving hours.)
